Mr. Raoul Roth
6350 Laurel Canyon Blvd.
Suite 255
North Hollywood, CA 91606

Dear Raoul:

It was nice to see you after such a long time. I'm happy to see that you are doing well in your law practice.

I was glad to hear that you remember my paper TM 312-118 on the determination of one-way conic trajectories after all these years -- and that you do not recall the paper I wrote one month later on the determination of round-trip trajectories.

I was surprised to learn that your modification of my UCLA gravity-assisted multiplet trajectory program was sent to another research center for processing. Clarke told me that he was sending some of my trajectory calculations to other researchers, but I had no idea that he actually sent anyone a copy of what was essentially my UCLA program! I wonder why he did that without telling me? I always wondered what happened to it since it was never used at JPL.

Thank you very much for your time.

Sincerely,

Dr. Michael A. Minovitch
President
